

Spring Creek Memory Center Volunteer Opportunity

Raised Garden Bed Maintenance, planting and harvest help

Spring Creek Memory Center in Bozeman, Montana is home to adults with memory difficulties including dementia and Alzheimer's. In order to provide a place to gather, trigger a memory and provide therapy, MSU – Bozeman students Stephanie Dyer and Virginia Nollmeyer, along with Alumnus Paul Wichman, SCMS Activities Director Stacia Jensen and 1000 New Gardens put in place four raised garden beds for the residents.

The gardens supply vegetables and flowers for the residents and kitchen facility. Volunteers will maintain the gardens, plant in the spring and provide harvest help if needed.
